

GRAPHACE PL - 2300[®]

OIL BASE PLUNGER LUBRICANT **NON GRAPHITE / HIGH VISCOSITY**

Graphace PL-2300[®] the new type plunger lubricant does not contain graphite at all. This lubricant was developed for betterment of working environment and improvement integrity of plunger machine.

For this purpose , we would compound especially selected high – heatproof lubrication additive and mineral oil. This lubricant is very effective to improve the strength as the oil film and the work as the oiliness.

So if you should use it properly , this lubricant would be formed the thin protective oil film and guarded the shooting sleeves and plunger tips from the friction.

SPECIFICATIONS

Appearance	Brown Color Oil
Viscosity	2000 cst
Specific Gravity	0.90
Flash Point	280 °C

COMPOSITIONS

Petroleum oil , High – Heatproof lubrication additive.

USAGE

For the correct way to apply this lubricant , we recommend you to apply it with automatic dropping system or automatic spray system. Usually , the upper character keeps the machine to be in good condition.

Please keep the PL-2300 from direct sunlight , dust sunlight , dust and freezing in winter season.

Keep sealed after opening every time.

PACKING

18 kg Pail Can
