

GRAPHACE PL - 5[®]

OIL BASE PLUNGER LUBRICANT NON-GRAPHITE / LOW VISCOSITY

Graphace PL-5[®] is developed to keep cleaner circumstances. This is composed of selected lubricating oils and high temperature lubricity additives. Non-graphite, but extremely effective surfactants are added to increase wetting ability and film strength. Properly used this lubricant will provide thin uniform protective coating which will minimize wear of shot sleeve and tip.

TYPICAL PHYSICAL DATA

Appearance	: Yellow brown fluid
Specific gravity	: 0.91
Viscosity	: 200 – 300 cst
Flash point	: > 250°C

COMPOSITIONS

Petroleum oil, oiliness agent, extreme pressure additives, fatty oil.

CHARACTERISTICS

1. Keep the production environment clean.
2. Excellent lubricating capability under the hardest conditions.

APPLICATION

Recommended to use spray system or dropping style automatic lube system.

STORAGE

Keep in a cool area and avoid from the sunlight during summer and freezing during winter.

Once opened replace lid and seal tightly.

PACKAGING

18 Kg pails.
