

PREX COAT ANTILOWA W[®]

(Made in Germany – distributed by Hanano Corp.)

ANTISOLDERING WAX **FOR METAL DIE CASTING**

DESCRIPTION

Prex Coat Antilowa-W is made of fine colloidal graphite powder dispersed in petroleum base oil. Added with several materials and additives, Prexcoat Antilowa-W is considered as the best antisoldering wax in the world. Strongest film produced by this wax will be created on die surface, gives excellent releasing performance, free scratch to die means no soldering problems, and best applied for 'untouchable area of die', which unable being reached by usual die lube. Protect and prevent damage on core, pin and die surface.

TYPICAL PHYSICAL DATA

Appearance	Black Paste
pH	Not Applicable
Flash Point	> 700 °F
Specific Gravity	0.93

COMPOSITIONS

Heavy Mineral Oil	60 ~ 65 %
Synthetic Polymer Compound	18 ~ 22 %
Grease	9 ~ 11 %
High Pressure Additive	9 ~ 11 %

BENEFITS AND CHARACTERISTIC

1. Protect die surface, cores, pins, and area which unreachable by die lube.
2. Produce strong film on die, give extra releasing performance, prevent soldering problem
3. Valuable being used for critical, complicated, and high temperature casting products.

APPLICATION

Brushed this antilowa paste to the pointed area such as critical point, overheated pins, complicated area, cores. Good being used for initially shot.

PACKING

1 kg / can
